Let It Snow! Let It Snow! Let it Snow!

By Deven Schuessler

Snow is coming whether you love it, or hate it. Around November 7 was the first snowfall and Christmas music started playing on the radio. Today, November 28, 2018, we have from about 2 to 4 inches. The snow is finally sticking to the ground, meaning its not melting the second it touches the ground and doesn't melt after a day. Now if you look out your window at sunrise, the sun reflects beautifully on the snow. As we all know Thanksgiving and Thanksgiving break has passed by, Christmas time is here! As Dean Martin says, Let It Snow!

Zelda: Breath of the Wild Review

Grace Ellis

This latest installment of the Legend of Zelda Nintendo game series was released on March 3rd, 2017. In its first year-and-a-half of gameplay, it has a 97% rating on Metacritic, and a 10/10 score on gamespot.com. Personally, I love this game. Having not played any Legend of Zelda games before, I did not know what to expect when starting the game. I was in awe. The graphics are amazing, the storyline is always giving you something to do, and the hundreds of NPCs have their own unique personalities! The detail that went into this game is apparent with every new place discovered, and I was constantly sucked into the game, then realizing that I had to do my homework! :D I really enjoyed this game and suggest this game to people who have never even played the other Legend of Zelda games!

Skiing and Snowboarding: A Favorite Winter Pastime

Grace Ellis

Ever since the mid-1840's, people have used the sport of skiing as a way of transportation, but more lately than ever has skiing been popular. Snowboarders too are slowly making their way to full acceptance in ski resorts all over the world. Especially this time of year, when snow is falling (hopefully) and the temperature is getting colder. More people are making their way to the ski slopes- My friends and I included. I encourage everyone out there to rent some skis or snowboard and try it out (although I recommend taking lessons first). Happy Skiing (or snowboarding)!!!!

Should Trump Let the Refugees In?

By: Amanda Cheng

We all know that there is a Refugee Caravan near a wall that President Trump built. He used the army to chase the refugees away. It has become something controversial and here are the top 5 most likely arguments to be used for each side.

Arguments against refugees:

- Some have bad intentions.
- They will take away our jobs.
- They will try to ruin our government.
- They are spies for the Russians.
- They don't deserve to be here.

Arguments for refugees:

- They need our help.
- Their country is in ruin.
- They risk their lives to get here.
- They are escaping bad living conditions.
- Their lives are in ruin.

There are many more arguments than this to argue with, but one thing's for sure,

Farming Simulator 19

By Deven Schuessler

Farming Simulator 19 is the latest version in the series. Now if you think that it's just some boring farming game, your kind of right if don't like farming. But it is still fun. You get to ride and buy all types of vehicles. You can play online with other people or go solo and play career mode. You can start from scratch or start up with basic items. There are three maps, Felsbrunn, Ravenport, and Estancia Lapacho. Some of the new features include,

- Brand New 4K Graphic
- John Deere now in the game
- New American and European environments
- New Farming activities
- New Machinery and crops
- New animals including horses

Besides harvesting, planting, and watering, Farming Simulator doesn't have that much action... until you find glitches. To conclude, Farming Simulator is a really good game. Note this game does take some time for the crops to grow and to get back and forth from your plots and to the drop of sites.

refugees are a very complex topic.
